

KAMAR BDAIR

Expected Computer Science Graduate | Artificial Intelligence

Jeddah, Saudi Arabia | amora7405@gmail.com | +966 55 668 1381 | github.com/kmbdair | linkedin.com/in/kamar-bdair

PROFILE

Computer Science student at Effat University specializing in Artificial Intelligence, with interests in machine learning, software engineering, data analysis, web development, and user-centered digital solutions.

EDUCATION

Effat University | 2023-2027

Bachelor's Degree, Computer Science - AI Specialization

Nobles International School | 2009-2023

American High School Diploma

CORE SKILLS

- Leadership
- Communication
- Teamwork
- Collaboration
- Project Management
- Problem Solving
- Front-End Development
- UI/UX Thinking
- Time Management
- Critical Thinking
- Research
- Design Thinking

TECHNOLOGIES

- Python
- Java
- JavaScript
- C++
- SQL
- HTML/CSS
- React
- Node.js
- Git
- Pandas
- NumPy
- TensorFlow
- Matplotlib
- Scikit-learn
- Jupyter Notebook
- Cisco Packet Tracer

LANGUAGES

- Arabic (Fluent)
- English (Fluent)
- German (Basic)

PROJECTS

FlowRose

E-commerce flower gifting website

- Built a responsive online platform for browsing, personalizing, and ordering flower bouquets with luxury add-ons.
- Contributed to backend/database connections and designed home and bouquet listing pages.

GiftCompass

Smart gift recommendation system

- Designed a software engineering project that recommends gifts based on interests, relationship, occasion, age group, and budget.
- Included feasibility study, requirements, design patterns, diagrams, ML approach, testing plan, and UI/UX screens.

ATM Management System

Java OOP simulation

- Simulated ATM features such as authentication, account management, deposits, withdrawals, transfers, transaction history, file handling, and GUI interaction.

Cisco Multi-Site Organization Network

Computer networks project

- Designed a three-site network with LAN/WAN connectivity, routers, switches, DHCP, DNS, HTTP services, and inter-site testing.

Hotel Reservation System Database

Database system concept

- Designed a hotel booking database application with hotel search, room availability, booking management, secure payments, and dynamic pricing.

PAPERS & REPORTS

- Robotics and Automation in Everyday Life
- AI and Machine Learning Hardware
- Genomics and Gene Editing
- Emerging Cyber Threats

EXPERIENCE & VOLUNTEERING

Mawakeb Al Ajer | 2022

Volunteer Clothes Distributor

- Assisted in collecting, sorting, and distributing clothing donations to individuals and families in need.

Subha Charity Organization | 2023

Volunteer Food Distributor

- Prepared and distributed food to underprivileged neighborhoods before Iftar during Ramadan.

Annual Breakfast | 2023

Coordinator Organizer

- Supported event organization, meal service, communication, teamwork, and smooth event operations.

The 3rd International Architecture and Design Conference and Expo | 2024

Organizer

- Supported event organization, attended panels, and networked with professionals and peers.

CERTIFICATIONS

- Linear Algebra for Machine Learning and Data Science - DeepLearning.AI
- Calculus for Machine Learning and Data Science - DeepLearning.AI
- Introduction to DevOps - IBM
- Developing Interpersonal Skills - IBM
- Workplace Ethics and Professionalism - LearnKartS
- Preparation for Job Interviews - Coursera
